

Naibor

NEWS FLASH!

We have lots of **BIG CAT ACTION** around Naibor Camp this month, so make a note in your diary for ...

CHEETAH! - no fewer than eight individuals have been “spotted” (haha!) already by mid-July, including the three brothers on a Wildebeest kill, a mother with two mature cubs and two adult males including a “grizzly” one new to the Mara, probably from the Serengeti.

LION! - a mother with three tiny cubs have been the centre of the Lion activity and up to three separate prides have been recorded daily, including one with three big-maned males.

LEOPARD! - always a favourite with Naibor guests, our resident Leopardess Binti was seen close to camp a few days ago and appears to be pregnant, which is her first time. Meanwhile, Olive and her two half-grown cubs have been showing superbly between the camp and the airstrip. A male and a transient female, also with two cubs, have also been seen in July so far.

SERVAL! - one seen in short grass close to Naibor was hunting rodents. Our guests watched this elusive creature for over an hour at close range!

Migration is still in full-swing in the Mara
with regular ‘crossings’
seen on Naibor game-drives!
